# Streetex

- **Zone 1, 2, 21, 22**
- **Savings on energy costs, maintenance and installation**
- **Immediate high-intensity activation**
- **Visual comfort**
- **Durable and safe over time**

Fins for heat dissipation

Polyester coating RAL 7035

LED board with optics

Stainless steel screws

Various installation options

Version with direct vertical pole mount

Version with direct horizontal pole mount

Version with mounting bracket and cable entry with cable gland

CORTEM *GROUP®*

STREETEX Series LED street lighting fixtures

STREETEX series LED lighting fixtures are suitable for outdoor and perimeter street lighting of industrial areas, especially for the chemical and petrochemical, on-shore and off-shore sectors as it is certified for installation in Zone 1, 2, 21, 22 and in accordance with Directive 2014/34/EU. An essential feature for road safety, STREETEX street lighting fixtures provide the lighting needed to ensure adequate visibility during night time or low-light conditions in all those areas where low- and medium-power discharge lighting fixtures were generally installed.

The STREETEX series is available in two sizes and features a finned body, made of aluminium alloy that acts as an excellent heat sink. Designed following the specific requirements of street lighting, STREETEX can be supplied in versions with direct horizontal/vertical pole mount or with a mounting bracket and cable gland. Different types of optics can also be installed directly on the LED plate. Optics is a crucial part of street lighting as it determines the direction of light on the road surface according to different requirements: light concentrated in a specific direction or evenly diffused light.

Efficient and functional especially in terms of installation and maintenance operations, STREETEX street lighting fixtures stand out for their exceptional energy efficiency in addition to a substantial reduction in product maintenance.

Sectors of application:

| Petroleum refineries | Chemical and petrochemical facilities | Anti-light pollution | Offshore facilities | Onshore facilities | Perimeter zone lighting | Petroleum loading/ unloading pontoons | 100% produced by Cortem |

ORIGINAL PRODUCT

TESTED
810b83bbcf

NO PHOTOBIOLOGICAL RISK
(IEC / EN 62471 STANDARD)

MECHANICAL FEATURES

|	
Body:	Aluminium alloy with low copper content. With cooling fins for efficient heat dissipation
Front glass:	Tempered glass, resistant to high temperatures and shocks
Gaskets:	Silicone resistant to acids, hydrocarbons and high temperatures
Fastening bracket:	Galvanized steel
Screws:	Stainless steel
Entry points:	1 entry point Ø1 1/2" for version with direct pole mount
	1 entry point M20 complete with NAV20IB cable gland for version with mounting bracket
Coating:	Polyester RAL 7035 (Light grey)
Corrosion Resistance:	The STANDARD of the aluminium alloy used by Cortem has passed the tests required by the Standard EN60068-2-30 (hot-humid cycles) and EN60068-2-11 (salt fog test)

ACCESSORIES ON REQUEST / SPECIAL REQUESTS

Poles with different diameters and lengths complete with junction box attached to pole base
Lighting fixture fastening bracket in AISI 304 or AISI 316L steel

### STREETEX-..-080.. LIGHTING FIXTURE IN DETAIL

Aluminium alloy lighting fixture lid painted in RAL7035

LED board

Tempered glass, resistant to impacts and high temperatures in the aluminium body

Aluminium alloy lighting fixture body painted in RAL7035
Internally they house:
Connection terminals L, N, PE
Cross-section max. 4mm^2.
Resin electronic power unit in accordance with EN/IEC 60079-0 and EN/IEC 60079-18

Cable gland NAV20IB

Galvanized steel fastening brackets

Light beam (beam)	• Full angle at 50% from the maximum point: ~ 115°x 155° • Full angle at 10% from the maximum point: ~ 140°x 160°	• Full angle at 50% from the maximum point: ~ 125°x 60° • Full angle at 10% from the maximum point: ~ 150°x 125°	• Full angle at 50% from the maximum point: ~ 90° • Full angle at 10% from the maximum point: ~ 160°
Description	Type I: extensive and symmetrical linear irradiation, with a large amount of light on both sides of the fixture. The width of the Type I light will be equal to the mounting height of the fixture.	Tipo III: oval irradiation with greater intensity at the front. The width of the Type III light is approximately 2.75 times wider than the mounting height of the fixture.	Type V: Circular irradiation, equal and uniform on all sides symmetrically, fixtures intended for installation in the centre of large areas to be illuminated
